### 1. What is data wrangling? Why do you need it? (5M)

**Data wrangling**, also known as data munging, is the process of cleaning, structuring, and enriching raw data into a desired format for better decision-making in less time. This process involves several steps, such as:

1. **Data Collection:** Gathering raw data from various sources.
2. **Data Cleaning:** Identifying and correcting errors or inconsistencies in the data.
3. **Data Transformation:** Changing the format, structure, or values of the data.
4. **Data Enrichment:** Enhancing data with additional information.
5. **Data Validation:** Ensuring the data meets the desired quality criteria.

#### Need for Data Wrangling:

- **Improved Data Quality:** Ensures data is accurate, complete, and reliable.
- **Enhanced Analysis:** Clean and structured data facilitates better analysis and insights.
- **Time Efficiency:** Saves time for data analysts by automating the preprocessing steps.
- **Better Decision Making:** High-quality data leads to more informed and effective decisions.
- **Consistency:** Standardizes data from different sources to be used seamlessly in analysis tools.

### 2. Differentiate between Business Intelligence and Data Science. (5M)

#### Business Intelligence (BI):

- **Purpose:** Focuses on using data to make business decisions by analyzing historical data.
- **Tools and Techniques:** Utilizes reporting tools, dashboards, OLAP (Online Analytical Processing), and data warehousing.
- **Skills:** Requires expertise in SQL, data visualization, and business acumen.
- **Outcome:** Provides insights into business performance, helping in operational and strategic decisions.
- **Time Frame:** Retrospective analysis of past and present data.

#### Data Science:

- **Purpose:** Uses advanced analytics to predict future trends and find patterns.
- **Tools and Techniques:** Employs machine learning, statistical analysis, and algorithms.
- **Skills:** Requires programming (Python, R), statistical knowledge, and machine learning expertise.
- **Outcome:** Builds predictive models and provides deeper, more complex insights.
- **Time Frame:** Predictive and prescriptive analysis for future planning.
-

**Marks:30**

**3. List and Explain the various types of analytics in big data. (5M)**

1. **Descriptive Analytics:**
  - **Explanation:** Summarizes historical data to understand what has happened in the past.
  - **Examples:** Reports, dashboards, data mining, and data aggregation.
2. **Diagnostic Analytics:**
  - **Explanation:** Examines data to understand the causes of past outcomes.
  - **Examples:** Root cause analysis, correlation analysis, and drill-down techniques.
3. **Predictive Analytics:**
  - **Explanation:** Uses statistical models and machine learning techniques to forecast future outcomes based on historical data.
  - **Examples:** Risk assessment, sales forecasting, and customer behavior prediction.
4. **Prescriptive Analytics:**
  - **Explanation:** Suggests actions you can take to affect desired outcomes.
  - **Examples:** Optimization algorithms, decision analysis, and simulation.
5. **Cognitive Analytics:**
  - **Explanation:** Uses artificial intelligence to mimic human thought processes for deeper insights.
  - **Examples:** Natural language processing, machine learning, and automated reasoning.

**4. List and Explain the key roles for successful analytics projects. (5M)**

1. **Data Analyst:**
  - **Role:** Analyzes data to find trends and insights.
  - **Skills:** SQL, Excel, data visualization, and statistical analysis.
2. **Data Scientist:**
  - **Role:** Develops advanced analytical models to predict future trends.
  - **Skills:** Programming (Python/R), machine learning, and statistical modeling.
3. **Data Engineer:**
  - **Role:** Designs and maintains data architectures and pipelines.
  - **Skills:** ETL processes, big data technologies, and database management.
4. **Project Manager:**
  - **Role:** Oversees the project, ensuring it meets business objectives and timelines.
  - **Skills:** Project management, communication, and stakeholder management.
5. **Business Analyst:**
  - **Role:** Bridges the gap between IT and business by understanding business needs and translating them into technical requirements.
  - **Skills:** Business acumen, requirement analysis, and stakeholder management.
6. **Subject Matter Expert (SME):**
  - **Role:** Provides domain knowledge and expertise.
  - **Skills:** Deep understanding of the specific business area.

### 5. Explain data analytics cycle with suitable diagram and its phases (5M)

#### Data Analytics Cycle Phases:

- 1. Data Collection:**
  - Gathering data from various sources.
- 2. Data Cleaning:**
  - Removing or correcting inaccurate data.
- 3. Data Integration:**
  - Combining data from different sources into a coherent dataset.
- 4. Data Analysis:**
  - Applying statistical and analytical techniques to understand the data.
- 5. Data Visualization:**
  - Representing data insights visually through charts and graphs.
- 6. Data Interpretation:**
  - Drawing conclusions and insights from the analyzed data.
- 7. Data Presentation:**
  - Communicating findings to stakeholders.

#### Short Notes:

- 1. Common tools for model building:**
  - **R and Python:** Popular programming languages with extensive libraries for data analysis and machine learning (e.g., scikit-learn, TensorFlow).
  - **Apache Spark:** A big data processing engine for large-scale data processing and machine learning.
  - **Jupyter Notebooks:** An interactive environment for running code, visualizing data, and sharing insights.
  - **KNIME:** An open-source platform for data analytics, reporting, and integration.
  - **RapidMiner:** A data science platform for machine learning, deep learning, text mining, and predictive analytics.
- 2. Model Selection for Data Analytics:**
  - **Purpose and Goals:** Choosing the right model depends on the specific objectives (e.g., classification, regression, clustering).
  - **Data Characteristics:** The nature of the data (e.g., volume, variety, and velocity) influences model selection.
  - **Performance Metrics:** Selecting models based on accuracy, precision, recall, F1 score, and other relevant metrics.

**Marks:30**

- **Complexity and Interpretability:** Balancing model complexity with the need for interpretability and ease of use.
- **Validation and Testing:** Using cross-validation and test sets to ensure model robustness and generalizability.

**Industrial Visit Report**

**Name and address of industry-** AIC- ADT Baramati Foundation shardanagar,Baramati

**Date of Visit-** 12/04/2024.

**Staff Coordinator-** Prof. Shendkar N.S ,Prof.Jamdade P.R.

**Objectives of Visit-** The visit was carried out under subject of Project Base Learning I to understand

The objectives of visiting AIC-ADT Baramati Foundation in Shardanagar, Baramati were to explore project-based learning opportunities in computer engineering. The visit aimed to understand how the foundation supports practical learning initiatives for students in the field. Additionally, it sought insights into the application of theoretical knowledge in real-world projects, fostering a hands-on approach to education. The visit also aimed to identify potential collaborations or resources that could enhance computer engineering education through project-based learning.

**Outcome of Visit-** Visit to AIC-ADT Baramati Foundation revealed valuable insights into integrating project-based learning in computer engineering education, fostering collaboration and resource utilization for enhanced student experiences

**Information of visit in brief:** A visit to AIC-ADT Baramati Foundation in Shardanagar, Baramati provided SE Computer Engineering students, accompanied by two faculty members, with valuable insights into project-based learning. They delved into practical applications, gaining a deeper understanding of core concepts in a dynamic environment. Engaging with cutting-edge technologies, students acquired hands-on experience, enriching their academic journey and enhancing proficiency in computer engineering.

**Value addition through industrial visit-** Besides the objectives of visit, the following additional technical information was given to the students during the visit.

- This hands-on experience helps in reinforcing theoretical concepts and gaining practical insights into industrial processes.
- Incubation centers provide essential workshops on product development, marketing, finance, and leadership for startup success.

Subject: - Regarding details of Visit to Baramati on Friday 12/04/2024.

Respected sir,

With reference to above subject, we are arranging visit to ATAL INCUBATION CENTRE AIC-ADT BARAMATI FOUNDATION Baramati on Friday 12/04/2024.

As a part of the curriculum for the subject Project Base learning , the students are required to undertake industrial visits to a few center of repute. In the above background, we would like to send a batch of about 28 students of SE. Computer accompanied by 2 staff members to visit industry. The list of students and staff members are attached below.

28 students  
forwarded to Non Secretary

## AIC ADT Baramati Foundation Visit Completion Certificate

### To Whom It May Concern,

This is to certify that Sharadchandra Pawar College of Engineering and Technology, Someshwarnagar with their SY Students of SE Computer Department has successfully completed the visit to AIC ADT Baramati Foundation on 12<sup>th</sup> April 2024.

During the visit, Students actively participated in the following activities:

- 1. Introduction to AIC ADT Baramati Foundation:** Brief description of the foundation's mission, vision, and activities.
- 2. Tour of Facilities:** Description of the facilities visited, such as labs, coworking spaces, etc.
- 3. Incubates/Startups Details:** Details of discussions held with startups, their projects, and any mentorship or guidance provided.
- 4. Networking and Collaborative Opportunities:** Summary of networking opportunities explored and potential collaborations identified
